This is the second Office Action for application serial number 10/633,075,
Support for Survey Rod, filed August 1, 2003.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,662,296 to Wu. The present invention reads on Wu as follows: Wu teaches a support comprising a grip (2), first leg (3), second leg (3), slidably mounting means (11), extending and retracting means (6), a mounting means (couplers found on the legs 3, respectively) for extending and retracting means and a releasable means (27) for fastening the extending and retracting means. The first leg is rotatably attached to the grip. The second leg is rotatably attached to the grip.

Response to Arguments

Applicant's arguments with respect to claim 2 have been considered but are moot in view of the new ground of rejection.

Allowable Subject Matter

Claims 3-47 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach the collar having an aperture and a releasable fastener in combination with the other elements recited which is not found in the prior art of record. Alternatively, the prior art of record fails to teach the support in combination with the survey rod.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Boehm 3,70,130 teaches a support for a surveying instrument; Vargas 4,366,940 teaches a survey tripod and Kellenberger 5,400,516 teaches a holder and stand for surveyor's rod.
